Dr. James E. Mills
5046 Highway 17 Bypass, Suite 103
Myrtle Beach, SC 29588

To Whom It May Concern:

I am writing this letter to let others know how considerate and professional you will find the staff and Dr. Mills during any and all treatments.

My family has been involved as patients for many years. We had a dear friend that was terrorized of a dentist. When he recommended Dr. Mills to us, we knew that was a special recommendation indeed. My daughter has had many difficult procedures completed by Dr. Mills and staff from simple cleaning to an implant. She has frequently had other doctors' comment on the excellent work completed by Dr. Mills on the implant.

My recent situation involved oral sedation due to problem joints in my jaw. My mouth is small for opening (difficult to work inside) and the longer it is open becomes a larger problem. Many years ago, my mouth wouldn't open for more than a quarter of an inch for several weeks, after receiving the preparation for a cap. Due to this problem, Dr. Mills is always cautious and provides preventative methods. Dr. Mills, being the expert I know him to be, gave me two tablets at 1:00 pm and set the procedure at 1:30 pm. At about 1:25, my driver (which is required) said I looked sleepy. I agreed and within a few minutes my name was called. I remember walking to the room and sitting down. I recall a pleasant conversation about my new granddaughter. The next thing I remember was waking up at home, very comfortable on the sofa. There was no pain or stress to the joints of my jaw and I certainly had a well-needed sleep as a bonus.

For anyone with normal to **serious concerns** about dentistry work, this would be fantastic. I highly recommend the oral sedation for joint problems of the jaw. A very caring dentist saved me a great deal of discomfort.

I give the highest of recommendations for Dr. Mills and his staff for their dentistry work and their personal kindness.

Sincerely,

Kathleen A. Britton (Kathy)
